

Debian Quality Assurance

Lucas Nussbaum
lucas@debian.org

Debian

Well known and respected for :

Debian

Well known and respected for :

- ▶ Its long and bumpy release cycles

Debian

Well known and respected for :

- ▶ Its long and bumpy release cycles
- ▶ **Its quality**

But it was not a given :

- ▶ > 1000 Debian Developers
 - ▶ Mostly volunteers, with their own agendas
- ▶ 15000 software packages
 - ▶ Some very popular packages
 - ▶ A lot of niche packages

Quality factors

Quality factors

- ▶ Culture : "*We release when it's ready*"
 - ▶ Many DDs won't compromise on this

Quality factors

- ▶ Culture : "*We release when it's ready*"
 - ▶ Many DDs won't compromise on this
- ▶ *Packages ownership* : individuals or teams
 - ▶ About 600 active developers
 - ▶ Many of them experts of their packages

Quality factors

- ▶ Culture : "*We release when it's ready*"
 - ▶ Many DDs won't compromise on this
- ▶ *Packages ownership* : individuals or teams
 - ▶ About 600 active developers
 - ▶ Many of them experts of their packages
- ▶ **Release Critical (RC) bugs**
 - ▶ Prevent packages from being part of a release
 - ▶ Everybody is welcomed to fix them
 - ▶ Non-Maintainer Uploads

Quality factors

- ▶ Culture : "*We release when it's ready*"
 - ▶ Many DDs won't compromise on this
- ▶ **Packages ownership** : individuals or teams
 - ▶ About 600 active developers
 - ▶ Many of them experts of their packages
- ▶ **Release Critical (RC) bugs**
 - ▶ Prevent packages from being part of a release
 - ▶ Everybody is welcomed to fix them
 - ▶ Non-Maintainer Uploads
- ▶ **Debian Quality Assurance team**

Debian QA team

- ▶ Goal : **Improve the quality of Debian as a whole**
- ▶ Not really a team (no strict membership), more like a central place to discuss and work on QA
- ▶ IRC : `#debian-qa@irc.debian.org`
- ▶ Mailing list : `debian-qa@lists.debian.org`

Debian QA team : Tasks

- ▶ Maintain infrastructure
- ▶ Run archive-wide checks and mass bug filings
- ▶ Take care of the dirty areas of Debian

Maintaining infrastructure

Infrastructure : mitigating the data hell

- ▶ Debian : aggregation of loosely-connected services
 - ▶ No Launchpad !
- ▶ Data everywhere
 - A dozen of places to get interesting data

**Tools required to gather data in a central place
and expose it to the maintainers**

Package Tracking System (PTS)

Overview of **nmap** source package

Go:

Switch style:

General information	Todo	Bugs count
Latest version: 4.68-1	Lintian reports 8 warnings about this package. You should make the package <i>lintian clean</i> getting rid of them.	All bugs (graph): 29 (32)
Maintainer: LaMont Jones	mentors.debian.net has version 4.76-1 of this package, you should consider sponsoring its upload.	RC bugs : 0
Conforms to: 3.7.2.2	The package should be updated to follow the last version of Debian Policy (Standards-Version 3.8.2 instead of 3.7.2.2).	I&N bugs : 13 (14)
Priority: extra	The BTS contains patches fixing 1 bug , consider including or untagging it.	M&W bugs : 12
Section: net		F&P bugs : 4 (6)
VCS : Git (browse)		PTS subscription
Available versions (more...)	Latest news RSS	Subscribers count: 5
Oldstable : 4.11-1	[2009-02-16] nmap 4.68-1 MIGRATED to testing (Britney)	<input type="text" value="Subscribe"/> <input type="button" value="↓"/>
Stable : 4.62-1	[2008-08-01] Accepted 4.68-1 in unstable (low) (LaMont Jones)	<input type="text" value="your email"/> <input type="button" value="Send"/>
Testing : 4.68-1	[2008-06-27] nmap 4.62-1 MIGRATED to testing (Britney)	Other links
Unstable: 4.68-1	[2008-06-14] Accepted 4.62-1 in unstable (low) (LaMont Jones)	Changelog / Copyright
Source package	[2008-04-25] nmap 4.53-3 MIGRATED to testing (Britney)	Build: logs, more, exp, ports
Files .dsc .orig : .diff	[2008-04-04] Accepted 4.53-3 in unstable (low) (LaMont Jones)	Lintian report (0, 8)
Binary packages		Popcon stats
nmap (27 bugs: 0, 12, 9, 6)		Ubuntu ...
		Version: 4.76-0ubuntu4
		Patch for version 4.76-0ubuntu4
		13 open bugs

Developer-centric view

<http://qa.debian.org/developer.php>

Ultimate Debian Database (UDD)

- ▶ Gather everything into a single SQL DB
- ▶ Perfect tool for data-mining Debian

Currently imported in UDD :

Debian Sources and Packages, bugs, popcon, testing migrations, upload history, orphaned packages, carnivore, lintian, debtags, translations, NEW queue, screenshots, DEHS, ldap, wanna-build, removals, **Ubuntu Sources and Packages, Ubuntu bugs, Ubuntu popcon**

Possible questions you can answer with UDD :

- ▶ RC buggy packages in testing, sorted by popcon ?
- ▶ Packages for which the last 4 uploads were NMUs ?
- ▶ Packages not maintained by official DDs ?

`http://udd.debian.org/`

Archive-wide checks and Mass bug filings

Archive-wide checks and MBF

- ▶ Developers are volunteers :
 - ▶ Focus on interesting things
 - ▶ Manual testing is boring → not done
- ▶ **Need automated tests**
- ▶ Other advantage : treats all packages equally
Niche packages are very important to some users

Archive rebuilds

- ▶ **Rebuild all packages from source**

7 hours on 40 8-cores build nodes (Thanks OpenOffice.Org)

- ▶ Detect packages that Fail To Build From Source (FTBFS)

- ▶ Bugs in packages
- ▶ Toolchain bugs
- ▶ Failures caused by changes in other packages

- ▶ Ran every 2-3 weeks

- ▶ Scripts to analyze failures and file bugs semi-automatically (about 200 bugs filed per hour)

- ▶ Also used for test rebuilds with new compilers, linkers, ...
→ Valuable information for upstream

Debcheck

- ▶ Check (statically) that dependencies can be satisfied
- ▶ Not trivial : versioned dependencies, conflicts
- ▶ 2 versions :
 - ▶ "Simple one", in PHP
<http://qa.debian.org/debcheck.php>
 - ▶ Better one : edos-debcheck (EDOS project)
 - ▶ Can also work with RPMs
 - ▶ <http://edos.debian.net/>

Type of Issue	ARCH

Piuparts

- ▶ Testing package installation, upgrade and removal
- ▶ Find bugs in maintainer scripts
(Shell) scripts executed during package installation/removal
- ▶ Developers don't run it on their systems
→ Archive-wide setup

`http://piuparts.debian.org`

Lintian

- ▶ **Static analysis of packages**
- ▶ Usually run locally by the developer, before uploading
- ▶ Archive-wide setup for continuous testing
- ▶ Packages now rejected at upload time for some errors

`http://lintian.debian.org`

DEHS - Debian External Health Status

- ▶ Monitor upstream version of packages
- ▶ Detect when the Debian package is outdated
- ▶ HTML scraping + regular expressions configured in `debian/watch`

<http://dehs.alioth.debian.org>

Taking care of the dirty areas of Debian

Taking care of the dirty areas of Debian

Two complementary approaches :

- ▶ Focus on packages neglected by their maintainers
- ▶ Focus on maintainers neglecting their packages

Neglected packages

- ▶ Already orphaned :
 - ▶ Do **minimalistic maintenance**
 - ▶ Problem : > 500 orphaned packages
- ▶ Not (yet) orphaned :
 - ▶ Find them, **orphan or remove them**
 - ▶ Goal : *Put maintenance in the hands of people with time*

Bapase : finding neglected packages

- ▶ Multi-criteria search for neglected packages
- ▶ Based on Ultimate Debian Database

	Package	Score	Action	O age	Testing	Migrate	Popcon	Wnpp	RC	Bugs	Last upload	NMUs	Comments
1	lvttools	124269	Should be removed (since 2008-07-11)	2122 (2002-10-15)	270	270	180	RFA	0	9	91 (2008-05-07) (Maint: 2005-08-24)	4	maintainer and possible adopter pinged, and removal proposed to maintainer
2	metamail	114643	Should be removed (O pkg) (since 2008-01-28)	1404 (2004-10-01)	0	0	3263	O	0	12	151 (2008-03-08)		still has revdeps. prop_rm filed on rdep.
3	electric	112643	Should be removed (O pkg) (since 2008-01-30)	1238 (2005-03-17)	0	0	415	O	0	2	202 (2008-01-17)		
4	epplets	104381	Should be removed (since 2008-03-26)	132 (2008-03-27)	270	270	475	O	2	8	940 (2006-01-09) (Maint: 2005-03-30)	2	
5	subcommander	103864	Should be orphaned (since 2008-05-22)	21 (2008-07-16)	270	270	329	O	3	5	123 (2008-04-05) (Maint: 2006-11-20)	1	
6	libstreamer-perl	103699	Should be orphaned (since 2008-02-06)	105 (2008-04-23)	0	0	47	ITA	0	3	92 (2008-05-06)		

<http://udd.debian.org/bapase.cgi>

Inactive maintainers

- ▶ **Missing In Action (MIA) team**
- ▶ Find them, track them, orphan their packages
Mostly based on reporting by users or fellow developers
Echelon : records activity of DDs ; Carnivore : tracks identities
- ▶ Collaboration with the Account Managers :
possible removal of their account
(Unused accounts → possible security problems)

Conclusion

Debian Quality Assurance :

- ▶ Mostly archive quality work
- ▶ Lots of tools and infrastructure developed within Debian
- ▶ What we don't do :
 - ▶ Focus on specific packages
 - ▶ Bug triaging
 - ▶ Manual testing to find bugs
 - ▶ Reliance on users to find/file bugs
